

## Evidence based early intervention programs

*Helping children reach their full potential through  
Early Intensive Behavioural Intervention (EIBI)*

### EIBI Programing centres around:

-  Play and social skills
-  Communication skills
-  Daily living skills
-  Pre-academic skills
-  Behaviour management
-  Motor skills

### About EIBI Therapy:

-  **Individual and intensive** Running for 3 hours, sessions are made up of short bursts of work centred around fun activities, play and breaks
-  **One-on-one at home** Senior and Junior therapists work with your child within your home
-  **Clinic meetings** You and your child's team evaluate your child's progress every 4 weeks

### NDIS terms and funding supports used to describe these services are:

- Improved daily living skills
- Improved relationships
- Increased social and community participation
